SUMMARY

I specialize in developing web applications using **React.js** and **Next.js**, and building APIs with **Node.js** and **Express.js**. I manage databases efficiently with **MongoDB** and **MySQL** and implement real-time features using **WebSockets**. With a strong focus on **JavaScript**, I deliver scalable and high-performance applications, collaborating effectively with teams to ensure clean code and system efficiency.

WORK EXPERIENCE

FullStack Developer- Heapware Technology   **July 2024 -Sep 2024**

I worked on web applications using React.js and Next.js for the frontend, creating dynamic and responsive user interfaces. I built APIs with Node.js and Express.js, and handled data using MongoDB. I collaborated with teams to design, develop, and deploy scalable applications, ensuring high code quality, seamless performance, and an excellent user experience.

Internship-Ashwiz Arfa Tower company   **Feb 2024 - May 2024**

I completed a 4-month internship at Ashwiz, where I gained valuable skills and contributed to projects assigned by senior developers.

PROJECTS

Digital Agency Website | Project | Source Code

With a sleek and modern design, this website showcases web design, branding, and marketing services, while highlighting the portfolio and client success stories. It features interactive elements and a clear call-to-action to engage potential clients.

Animated Landing Page | Project | Source Code

This animated landing page features dynamic visuals and smooth transitions to captivate visitors, while presenting key information and a compelling call-to-action to drive engagement. The interactive design enhances user experience and encourages exploration.

Scroll Animation Website | Project | Source Code

This project features scroll-triggered animations that bring elements to life as the user scrolls. Elements fade in, slide, or scale, enhancing the page's interactivity. These animations create a dynamic and engaging browsing experience.
